**DETAILED ACTION**

***Response to Arguments***

1. Applicant's arguments with respect to claims 1 and 5-10 have been considered but are moot in view of the election of species requirement prompted by applicant's amendment to the claims.

***Information Disclosure Statement***

2. The information disclosure statement (IDS) submitted on January 26, 2009 was filed after the mailing date of the final action on October 24, 2008. The submission is in compliance with the provisions of 37 CFR 1.97. Accordingly, the information disclosure statement is being considered by the examiner.

***Election/Restrictions***

3. This application contains claims directed to patentably distinct species. Applicant **must** first elect a species of fluid compositional device from those disclosed in the specification. If applicant elects gas chromatograph as the sensing device, applicant must elect a subspecies directed to a particular placement of the gas chromatograph in the device from those disclosed in the specification. Upon election of any species of sensing device, applicant **must** then elect a subspecies from the following: (a) a therapy device having no filtration means or (b) a device having a filtration means present. If applicant elects a subspecies having a filtration means, a subspecies of filtration means must then be elected from the following: (c) hydrophobic filter and (d) charcoal filter. To summarize, applicant must do the following in any reply to this Office action:

Art Unit: 3761

- a. Elect a species of sensing device (e.g. sensor array, gas chromatograph (hereafter "GC"));
  - b. Elect a subspecies of device with regard to filtration means (i.e. sensing device either having filtration means or no filtration means);
    - c. **IF ELECTING GC ONLY:** Elect a subspecies of configuration if electing the species with the GC (e.g. GC between the canister and the vacuum source, embedded in the screen means)
    - d. **IF ELECTING SPECIES WITH FILTRATION MEANS ONLY:** elect a subspecies of filtration means (e.g. hydrophobic filter, charcoal filter)
4. The species are independent or distinct because claims to the different species recite the mutually exclusive characteristics of such species. In addition, these species are not obvious variants of each other based on the current record.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, no claims are generic.

There is an examination and search burden for these patentably distinct species due to their mutually exclusive characteristics. The species require a different field of search (e.g., searching different classes/subclasses or electronic resources, or employing different search queries); and/or the prior art applicable to one species would not likely be applicable to another species; and/or the species are likely to raise different non-prior art issues under 35 U.S.C. 101 and/or 35 U.S.C. 112, first paragraph.

**Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species to be examined even though the requirement may be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected**

Art Unit: 3761

**species**, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

The election of the species may be made with or without traverse. To preserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the election of species requirement, the election shall be treated as an election without traverse. Traversal must be presented at the time of election in order to be considered timely. Failure to timely traverse the requirement will result in the loss of right to petition under 37 CFR 1.144. If claims are added after the election, applicant must indicate which of these claims are readable on the elected species.

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the species unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other species.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which depend from or otherwise require all the limitations of an allowable generic claim as provided by 37 CFR 1.141.
